

ADVANTAGES

- Integrated plenum for reduced resistance with face mounted prefilter.
- Overall footprint reduction of 50% when compared to traditional 12-inch filters.
- V-bank design for units with limited space.
- Designed to ease installation in confined areas.

Application

Suitable where no downstream space exist and where best-in-class Durafil ES3 is desired.

Installation Options

Installed with 6" style spring fasteners into existing HVAC filter frames. Clips required to hold 2-inch prefilter to face are C-84-2. For 4-inch, use C-84-4
